EXPERIMENT-4

DIVISION:
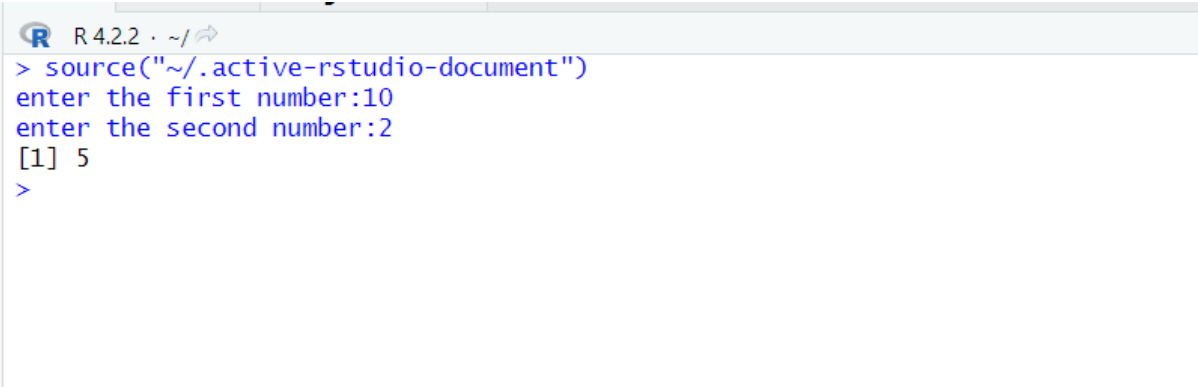

AIM:

To prove the program for division using R-tool.

PROGRAM:

num1=as.integer(readline(prompt = "enter the first number:"))

num2=as.integer(readline(prompt = "enter the second number:"))

num3=num1/num2

print(num3)

OUTPUT:

```
R  R 4.2.2 · ~/
> source("~/.active-rstudio-document")
enter the first number:10
enter the second number:2
[1] 5
>
```

RESULT:

Thus the basic program division was executed successfully.
